Day 1 of Classes

By Day 1 of Week 1, most of the online course design work is complete and students have access to course content. Students will be logging in and the learning begins. As with any course, starting off right is important. Online learning brings with it a certain amount of anxiety and uncertainty for some students. The goal is to get students engaged and comfortable with this type of learning.

The First Week

In addition to sending a **Welcome Letter or Announcement** to your students, you could plan a few first week activities that help orient your students to your course format and Moodle. Having students check for required software and hardware, post an introduction message on the Discussion forum, read the [Academic Integrity and Conduct Policy](#) or participate in a scavenger hunt that takes students to different areas in Moodle—and also your publisher’s content, if used—are all good ways to help orient and familiarize your students to the online environment.

Week One: What do online instructors suggest?

Many online faculty members advocate for dedicating the first part of the first week of the course to orientation-type activities, and stress the importance of building an effective foundation for student engagement and course success should be a high priority. Take time for activities that introduce the students to each other and to the faculty in order to create a sense of community, a sense that “we are all in this together.”

Here are additional recommendations from faculty:

- “Be available online with office hours to ‘chat’”
- “Take advantage of interactive technology”
- “Clear deadlines/expectations for discussions”
- “Reinforcement is important, build your class while learning”
- “Prepare your course shell early”

Weekly

Many online students have voiced one of their main dislikes of online courses is the feeling of working in isolation. An online course should provide students with multiple opportunities to engage with the content and their classmates:

- Provide a weekly schedule (*week at a glance in template*) at the beginning of the term for readings, assignments and assessments, with clear due dates so students can plan their school demands in concert with work and family schedules
- Utilize structured asynchronous discussion forums, formative learning checks, breakout groups for assignments that build interpersonal relationships, and audio/video tools ideally within the LMS (though other software such as Zoom, and Google Meets and Hangouts can also be used).
- Individual audio/video feedback on assignments communicates an instructor’s attention to individual learning

Teaching Online @ SEU

All Online courses are expected to use and follow the SEU Online template.

Please contact Jeff Gutkin, Director of Instructional Technology to schedule an appointment or learn about upcoming training opportunities
